

SAMUEL R

Web Developer | UI/UX Designer

+91 7603837694 • samuelxxx1207@gmail.com • Tirunelveli, India • [linkedin.com/in/samuel-1207-r](https://www.linkedin.com/in/samuel-1207-r)

CAREER OBJECTIVE

Motivated Web Developer and UI/UX Designer with hands-on experience building responsive, performance-driven web applications using **HTML5, CSS3, JavaScript, and Tailwind CSS**. Proficient in Figma-driven design workflows from wireframe through deployment. Seeking a developer or front-end role where I can contribute clean, accessible UI, optimise user flows, and grow expertise in modern JavaScript frameworks.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, TypeScript (basic), Python, Java, C, C++

Frameworks & Libraries: Tailwind CSS, React.js (basic), REST APIs (consumption)

Design Tools: Figma, Adobe XD, Adobe Illustrator, Adobe Photoshop, Canva

Concepts: Responsive Design, UI/UX Design, Wireframing, Prototyping, Performance Optimisation, Cross-browser Testing, Web Accessibility (WCAG basics)

Dev Tools: Git, GitHub, GitHub Pages, VS Code

Languages (Human): English (Fluent — Written & Spoken), Tamil

PROJECTS

Street Food Finder - Web Application

2024

HTML · CSS · JavaScript · Figma ·

- Designed and deployed a fully responsive 5-page web app using HTML5, CSS3, and vanilla JavaScript; achieved sub-2s page load by minifying assets and deferring non-critical scripts — a ~35% reduction in initial load time.
- Created end-to-end wireframes and high-fidelity mockups in Figma before development, cutting design revision cycles by 40% and aligning UI with user flow from the outset.
- Built food and hotel search functionality with intuitive filtering; applied responsive grid layouts tested across Chrome, Firefox, and Safari to ensure consistent cross-browser rendering.
- Managed full project lifecycle — from concept to live deployment on GitHub Pages — using Git for version control with feature-branch workflow throughout.

Tour Booking Management System – Web Application

2024

HTML · CSS · JavaScript · Figma ·

- Developed a fully responsive multi-page booking website using HTML5, CSS3, and JavaScript; optimised layout rendering to load core content in under 1.5s on a standard 4G connection.
- Reduced booking flow from 6 steps to 3 through iterative UI/UX redesign informed by usability heuristics, improving task completion efficiency by an estimated 50%.
- Applied WCAG-aligned contrast ratios and semantic HTML throughout, improving accessibility score in Lighthouse from 74 to 91.
- Led complete project lifecycle — wireframe to deployment — independently, maintaining Git version history with descriptive commit messages for every feature addition.

EDUCATION

B.E. Computer Science & Engineering

2024 – 2028

National Engineering College, Kovilpatti | CGPA : 8.23

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming(Java, C++), Database Management Systems, Computer Networks

ACHIEVEMENTS

- TCS CodeVita Round 1 Qualifier — competed in national-level algorithmic problem-solving contest among 100,000+ participants.
- Solved 1,400+ programming challenges on Skillrack (top platform in South India) and 70+ problems on LeetCode, demonstrating consistent problem-solving practice.
- Maintained a CGPA of 8.23 in B.E. Computer Science & Engineering (3rd Semester), ranking among the top performers in the cohort.
